# ECONOMETRIC CAREER DAYS

2025

11 - 19 November

Profiler

# Preface

Dear fellow students,

You have found it! The profiler of this year's edition of the Econometric Career Days (ECD), which will take place from the **11th to the 19th of November 2025**. Some of you may already be familiar with the concept, but for those who are not, let me briefly explain what the ECD is about. The ECD is the largest multi-day career event for econometrics students in the Netherlands. Whether you are just starting your Bachelor or in the last phase of finishing your Master, the ECD has numerous activities to offer you! Our main goal is to introduce you to companies that are looking for people like you. This way, you can start discovering what the working field of econometrics has in store for you. From presentations and cases to informal events and dinners, as well as the ECD Talks, Field Trip, Impact Day and even the PhD Drink, we have come up with a wide variety of activities in which you can participate.

Over the last year, our committee has worked very hard to organise this event. We invite you to this year's edition to **Shape Your Future**. This theme encourages you to take an active step towards discovering your path in econometrics and beyond.

The ECD kicks off with the **ECD Talks**, this year focusing on the theme: **Optimising Healthcare**. As we live in a fast-moving world shaped by data and AI, we will dive deeper into what econometrics has to offer the healthcare industry. We have gathered four speakers who work in different aspects of healthcare. We invite you to come and hear what they have to say, but also to ask your questions and let them hear your voice on thought-provoking statements. The **Field Trip** will take us to the harbour of Rotterdam, in collaboration with Maersk, one of the biggest global logistics companies. During this day, you will get the unique opportunity to experience a company at its own workplace. On the 13th of November, we will host the **Impact Day**. This day highlights companies in the econometrics field that dedicate much of their work to making a positive impact on society. If you are interested in such companies, do not forget to check out the schedule for this day and sign up for one of the activities!

These activities are just a glimpse of the diverse program the ECD provides. All in all, we hope to provide you with the perfect opportunity to meet companies, grow your professional network, discover where your interests truly lie, and start shaping your future. This profiler provides an overview of the programme and includes information on all participating companies, helping you decide which activities and companies are most interesting for you. **Subscriptions open on the 8th and close on the 29th of October**. As some activities require it, make sure to have your **updated CV** ready.

Do not forget to follow us on Instagram and LinkedIn (**@ecdrotterdam**) and visit our website (**ecdrotterdam.nl**) for additional information. And never hesitate to reach out to us if you have any questions. We look forward to welcoming you at the ECD 2025!

On behalf of the Econometric Career Days Committee,

Julia op den Akker

## Cases

---

A case is a perfect way to learn about a company's work field and their company culture. You get to work on a representative company case thereby allowing you to learn more about the company and to apply your analytical skills to tackle a problem. Afterwards there is either a lunch or drink included in a morning or afternoon case respectively. Here you get to talk to the employees and ask all your questions.

## Presentations

---

Still trying to figure out what sectors suit you best? You could join us at one of the company presentations! In only 1.5 hours you will get a clear picture of a company, its employees, their daily work, career paths, and exciting projects. Moreover, there will be plenty of time to ask questions. In short, a simple but inspiring way to discover where your future could take you.

## Informal Activities

---

An informal activity lets you connect with companies in a relaxed, social setting. From wine and beer tastings to sports or barista workshops, these sessions create the perfect balance between fun and career exploration. You'll have plenty of time to meet professionals and discover which culture suits you best. It is a unique way in order to see if you are character wise a good fit for the company and whether their atmosphere matches yours.

## Company Dinner and Branch Dinner

---

Over a three-course meal, you'll get the chance to connect with company representatives in an informal yet professional way. Depending on the set-up, you either rotate between multiple companies from the same sector or spend the evening exclusively with one organisation. This unique setting allows for both meaningful conversations and relaxed networking, all while enjoying good food. This year we welcome two branch dinners and three company dinners.

## Workshops

---

In a workshop, you'll actively develop new skills guided by company experts. Expect an interactive session where theory quickly turns into practice, whether through coding, strategy, or teamwork exercises. You'll walk away with both knowledge and connections.

## Interviews

---

Do you want personal attention from your dream company? In one-on-one interviews, selected students sit down with recruiters and employees for an in-depth conversation. This is your moment to showcase your ambitions, ask targeted questions, and leave a lasting impression. A unique chance to truly stand out.

## Impact Day

---

On 13 November, the ECD hosts the Impact Day, dedicated to companies that are actively creating positive change in society. This special day highlights how econometricians can contribute to solving major challenges in areas such as healthcare, energy, and sustainability. You'll get the chance to experience a workshop with EMC, tackle a case at SiRM and join the PhD Drink with PhD students to learn more about their research and experiences. It's the perfect opportunity to combine career exploration with meaningful impact. If you want to know more about the participating organisations, make sure to check out their company pages in this Profiler.

## PhD Drink

---

At the PhD Drink, doctoral candidates will share their research journeys, daily experiences, and the challenges and rewards of pursuing a PhD. You'll gain an authentic perspective on academic life and discover how research connects to real-world issues. With plenty of time for informal conversations over drinks, it's an inspiring way to explore whether a PhD could be part of your own future path.

### Meet us at the PhD Drink:

- Thursday 13 November
- 15:00 - 16:30

# Optimising Healthcare

## How Data Is Reshaping Tomorrow's Well-Being

The third edition of the ECD Talks will take place on **11 November** to kick off this year's ECD, focusing on how data is redefining the future of healthcare and well-being. In today's world, healthcare decisions are increasingly shaped by data, algorithms, and AI-driven models, offering great potential for improving patient outcomes and resource allocation. At the same time, these tools raise critical questions about privacy, fairness, and the ethics of decision-making. **Four experts in healthcare, economics, and data science will share their insights on both the opportunities for innovation and the risks that come with data-driven healthcare.**

### Meet our speakers

#### Marnix Bugel

Marnix Bugel is a board member and co-founder of the exquAlro foundation and the founder of Rewire. Marnix is an AI pioneer. In 2006 he started his own company Rewire. A company fully specialized in AI & Data. With 150 econometricians and mathematicians and offices in Germany and the Netherlands Rewire takes a leading position in transforming blue chip companies with AI. Based on his experience and passion, he co-founded exquAlro in 2022. exquAlro is a foundation with the mission to create medical breakthroughs with AI. To realize this mission exquAlro educates the next gen physicians of University Medical Centers in AI and develops and implements with them programs to create medical breakthroughs.

#### Madou Derksen

Madou Derksen has been working at Dutch Hospital Data (DHD) for over six years. She currently serves as Program Manager AI & PLUGIN and previously worked as Lead Data Scientist. With a background in Biomedical Sciences and Medical Informatics, she combines subject-matter expertise with strategic insight. She is one of the initiators behind the PLUGIN infrastructure, about which she will be pleased to share more on November 11.

#### Gerrit Hamstra

Gerrit is a director at Vintura/Equalis. He is responsible for the department of research and expert consulting. He has a background in applied physics with a specialization in physical informatics. His professional career started with statistical analysis of pharmaceutical studies (phase I) in 2002. After that he worked at health insurance company Achmea in data analytics and some years as a manager. In 2018 started working at Vintura/Equalis as a consultant.

#### Chiara Brück

Dr Chiara Brück completed her bachelors and masters in Econometrics and Operations Research at Maastricht University. She went on to pursue a PhD in Public Health at Erasmus MC, where she developed a microsimulation model to forecast the population-level burden of dementia. After defending her PhD earlier this year, she continues her research at Erasmus MC as a postdoctoral researcher, focusing on both dementia modeling and colorectal cancer modeling.

To wrap up the evening, we invite you to join us for a drink at Erasmus Paviljoen, where you can connect with fellow students and the speakers. A professional LinkedIn photographer will be present for formal profile pictures. This all will mark the celebration of the 13th edition of the ECD.

#### Meet us at the ECD Talks:

- Tuesday 11 November
- 14:30-18:30

The ECD Talks will be in **English** and is open to students of **all studies and study phases**.

# MAERSK

A.P. Moller – Maersk is a global integrated logistics company and the world's second largest container shipping line. Every day, we connect businesses and consumers across more than 130 countries, offering not only ocean transport but also inland logistics, warehousing, customs services, and digital supply chain solutions. Our goal is to simplify global trade and make supply chains more reliable, efficient, and sustainable.

What makes Maersk unique is the combination of scale and innovation. With a fleet of over 700 vessels and a strong inland network, we move millions of containers every year. At the same time, we are leading the industry in digitalization and decarbonization, for example through the Gemini Cooperation network design and our first methanol-enabled vessels that reduce emissions.

A field trip to Maersk in Rotterdam provides a chance to experience global trade up close. Rotterdam is Europe's largest port and a vital hub in our network. Visitors will learn how we manage container flows, balance supply and demand, and adapt to global disruptions, all while working to make logistics greener and smarter.

Our company is guided by five core values: Constant Care, Humbleness, Uprightness, Our Employees, and Our Name. These values reflect our responsibility towards customers, partners, and society.

Looking ahead, Maersk's vision is clear: to be the trusted global integrator of logistics, enabling sustainable and resilient supply chains while working towards net zero emissions by 2040. We are always looking for talent and offer multiple entry-level jobs and internships, which can be found on our company portal

## About DataStudent

Founded in 2018 by econometricians from Rotterdam, DataStudent connects analytically strong students with organizations that need data-driven solutions. Our mission is twofold:

1. To help companies unlock the full value of their data.
2. To provide ambitious students—especially those in econometrics and related fields—with the chance to apply their skills in real-world projects.

## What We Do

At DataStudent, you don't just study theory—you put it into practice. We offer: Short-term projects such as building dashboards, cleaning datasets, or running analyses. Long-term engagements where you join teams several days per week to tackle complex challenges. Graduate pathways through our DataVast model, helping you land your first full-time role. This means you gain practical experience while directly contributing to the success of businesses and organizations.

## What Makes Us Different

Unlike traditional firms, we combine academic rigor with real-world impact: Fresh perspectives – Our students bring the latest econometric and statistical methods. Technical skills – From Python and R to SQL and Power BI. Direct impact – What you build gets used immediately by companies. For you, it means a stronger CV, valuable professional connections, and a head start in your career. For companies, it means affordable, flexible access to top-tier data expertise.

## Core Values

- Accessibility – Making data understandable and actionable.
- Growth – Helping students and companies continuously improve

- Collaboration – Bridging academia and industry.
- Innovation – Using the latest tools and methods in real projects.

## Vision for the Future

We believe data is shaping the future of business and society. Our goal is to grow into Europe's leading talent hub for data-driven organizations, where ambitious students and companies come together to create innovative solutions.

## Vacancies for Econometric Students

We regularly recruit students in econometrics, mathematics, computer science, and physics. The process is simple:

1. Apply online.
2. We get to know you—your skills, ambitions, and interests.
3. You get matched with a project or role that fits you perfectly.

## Our Promise

We are not a CV-shuffling agency. Instead, we focus on quality and fit:

- Your CV will never get lost in a pile.
- We take the time to understand your profile.
- For every project, we present just one candidate: the best fit.

Our promise: quality over quantity, people over paperwork.

For econometric students, DataStudent is the ideal place to apply your analytical skills, gain hands-on experience, and make an impact—while building a strong foundation for your career.

Do you thrive in an environment where your growth and knowledge are constantly propelled to new heights? If so, you should get to know Optiver, a leading global market maker on the cutting-edge of technology, trading and research. Here's what we're all about:

### **The endless pursuit of excellence.**

Ready to accelerate your growth in one of the most dynamic and fascinating industries there is? Discover Optiver, a leading global trading firm powered by technical innovation. For 35+ years, Optiver has been improving financial markets around the world, making them more transparent and efficient for all participants. With our focus on cutting-edge engineering, data science and research, we actively trade on 70+ exchanges, where we're trusted to always provide accurate buy and sell pricing – no matter the market conditions.

### **Pushing the envelope one idea at a time.**

Every day at Optiver is an opportunity to solve the seemingly impossible. It's a place where you're empowered to build, code, develop and strategise ideas that push the boundaries of technological and analytical possibility. Every team member has an integral role to play in this endeavour. From traders to developers, engineers, researchers and business operations specialists, we all strive to find and own unique solutions. It's a melting pot of dynamic thought, fast execution and entrepreneurial spirit.

### **Your growth is our growth.**

Our ethos is based on a hunger for growth that touches everything we do. Accelerated growth not only applies to our global expansion, but also to every individual team member. Our people continually strive to improve and evolve into the best versions of themselves. Optiver fosters this constant growth by creating an environment

where all are considered equal and afforded the same opportunities to flourish. This flat, growth-minded structure rings true across all of our global operations, which span offices in Amsterdam, London, Chicago, Austin, Sydney, Shanghai, Singapore and beyond.

### **The brightest of the bright.**

When it comes to joining Optiver, the bar is set high – and for good reason. To remain at the forefront of market making, we need the best and brightest industry talent within our teams. Fortunately, we value potential over expertise, which is why we hire candidates from a diversity of backgrounds, studies and experience levels. No matter which walk of life they're from, when we find someone with the entrepreneurial spirit we seek, we take it upon ourselves to heavily invest into upskilling them with our world-class training programme.

Your next big growth opportunity could be in one of the following roles at Optiver:

- Quantitative Research Internship
- Quantitative Trading Internship
- Graduate Quantitative Researcher
- Graduate Software Engineer

To discover more about us, visit our website or contact us directly at [recruitment@optiver.com](mailto:recruitment@optiver.com). In the meantime feel free to learn more about who we are and what we do by following us on LinkedIn, Instagram, Twitter and Facebook.

#### **Interviews**

- Wednesday 19 November
- Afternoon 14:00-17:00

## Discover Optiver, a leading global trading firm powered by technical innovation

Are you ready to put your mathematical and analytical skills to the test? Do you enjoy solving complex problems?

We're hiring interns and graduates from diverse academic backgrounds to be part of our mission to improve the markets. With renowned training programmes followed by owning real-time projects, get ready to deliver tangible impact from day one.

To get more information about our job opportunities, visit our career website, or contact us directly at [recruitment@optiver.com](mailto:recruitment@optiver.com).

We look forward to meeting you at ECD 2025!

# Premium Partners

### **Allianz Group is a world leader in insurance and financial services.**

With over 125 million customers in nearly 70 countries and more than 157,000 employees, our goal is to be the most reliable financial service provider. We help our customers make the right choices so they can shape their lives the way they want. We encourage everyone to prepare well in order to achieve their ambitions. Get ready for the best.

### **What does Allianz do and what makes you unique in the industry?**

Allianz Group is a world leader in insurance and financial services.

### **What are Allianz's core values?**

Allianz's core values vary slightly across its diverse global operations, but generally center on **Integrity, Respect, Care (Customer Focus), and Excellence.** Many parts of the Allianz Group also emphasize Trust as a fundamental principle and promote a culture of Collaboration, Innovation, and Accountability to foster an inclusive, high-performing environment that serves customers and communities.

### **Are there any current job openings? If so, what does the application process generally look like?**

There are many different job opportunities in finance, legal, operations, and more. In addition, we will soon launch a **graduate program** for high-potential candidates, offering them the opportunity to grow within our organisation.

During the Econometric Career Days we will give a presentation of the risks for an insurance company in a highly volatile interest rate and inflation environment. In the business case you will learn to value various financial products in the current volatile market and find solutions to hedge these risks.

## Connect your future to Deloitte

You will join 7,500 people across 14 of-fices in the Netherlands offering pro-fessional services in the areas of Audit & Assurance, Technology & Transfor-mation, Tax & Legal, Support, and Strategy, Risk & Transaction Advisory. Connect your future to Deloitte and make an impact that matters!

## Together makes progress

Together, we help our clients navigate risks or deliver transformational chan-ges, future proofing their business. Because together, we make progress.

## Never stop growing

Your expertise fuels our capability, so we'll make sure you never stop gro-wing. Whether it's from the complex work you do or the people you colla-borate with, you'll learn every day to make an impact that matters.

## Passion for purpose

At Deloitte you create positive pro-gress for our clients, people and so-ciety. This sense of purpose is shared by everyone around you. Wherever your future lies, you'll be supported to achieve your ambitions your way.

## Be the true you

Want to experience a feeling of be-longing and acceptance at work? Then Deloitte is the place for you. We're making sure we're creating an environment where everyone is sup-ported and heard in order to make a valuable, personal contribution.

## Explore our business areas

### Audit & Assurance

As the world changes, businesses must be ready to respond to the challenges and opportunities that lie ahead. In Audit & Assurance we

ensure that companies operate as they should, building public confidence and trust. Are you in?

## Strategy, Risk & Transaction Advisory

In an ever-evolving world, there are no certainties in business. Are you ready to help clients navigate risks, process major transactions and deliver trans-formational changes that will future proof their business? Join us in ma-king a positive difference.

## Tax & Legal

Tax & Legal makes the work of peo-ple in tax and legal departments at our clients more efficient and effective. They spend a large part of the day collecting and interpreting informati-on and often work with outdated or sub-optimal methods. Are you ready to improve those processes with the help of technology?

## Technology & Transformation

Your journey to truly innovate at work starts at Deloitte. Are you in? Distinc-tive thinking, deep expertise, innova-tion and collaborative working, that's what connects us and that's what makes us Deloitte. If you want to help solve some of the biggest tech and transformational challenges around, join us.

**For more information about the case, check the Deloitte page on our web-site.**

### Meet us at the ECD:

- Wednesday 12 November
- Evening 18:00-21:30

#### Case

- Friday 14 November
- Morning 09:00-13:00

# Your technology career at Deloitte

At Deloitte, we believe that technology can make an impact. When applied by the right people, it can revolutionize industries, uplift communities, and shape a more sustainable future. We are looking for people with technology-based expertise to make this impact, who can unleash their potential to create meaningful change.

Scan the QR code to  
learn more

## Shape the future of energy

**Come up with the best strategies to make the North Sea a new green power house, work with market players to make the hydrogen economy a reality, or calculate how the most polluting companies can become market leaders of sustainability.**

## Shape the future of food

**Advise clients on how data-driven technologies can revolutionize the treatment of patients, brainstorm with clients on how to make healthier lifestyles more accessible, or analyze what can be done to increase overall happiness and well-being.**

## Shape the future of health

**Come up with new ways to reduce global greenhouse gas emissions from livestock, advise companies on how to innovate towards a healthier food supply, or research the newest possibilities that come with the hyper-personalisation of food.**

## Our Story

Founded in 2017 by three traders, Maverick Derivatives is a proprietary trading firm with headquarters in Amsterdam and a second office in Singapore. We specialise in U.S. equity options, crypto options, and Delta One products, trading primarily on U.S. markets and various crypto exchanges. As a proprietary trading firm, we trade for our own account, utilising in-house developed trading software in conjunction with a hands-on, data-driven approach.

What makes Maverick different is our open and casual culture. We have a flat organisational structure where ideas matter more than titles, and where everyone, from junior traders to the founders, works closely together. Traders at Maverick don't just follow instructions; they take ownership early on and are involved in designing and implementing strategies while learning from experienced colleagues. We believe in a pragmatic approach to trading: staying focused, working collaboratively, and always looking for ways to improve performance. Technology plays a key role in everything we do. By developing our trading software in-house, we can quickly adapt to changing markets and provide our traders with the tools they need to succeed. This combination of technology and trader-driven strategies helps us stay competitive in a fast-moving industry.

Our vision is to continue growing sustainably while keeping the culture that makes Maverick unique: entrepreneurial, collaborative, and result oriented. We want to give smart, driven people the opportunity to learn, take ownership, and build their careers in a supportive environment with the possibility to make impact early on.

## Opportunities for Students

We're especially excited about our Summer Trading Internship 2026, a program that combines hands-on project work with training sessions, workshops led by experienced traders, and fun activities. During the internship, students will conduct data analysis on financial markets, support trading strategy development, and work closely with our trading teams on real projects. Those who excel will be invited to continue as full-time Graduate Traders after the program, making this a true first step towards a trading career. Keep an eye on our website and LinkedIn for announcements about the upcoming Maverick Derivatives Summer Internship Program.

Meet us at the Econometric Career Days to learn more about Maverick Derivatives, our trading approach, and how you can become part of our story.

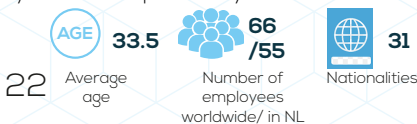

## Maverick Derivatives case

Ever wondered how trading professionals navigate a fast-paced and constantly changing market? On November 17th, you will get to meet some of Maverick Derivatives' talent from the trading team and learn about our culture, operations and insights from the trading world. After that, you will work on an engaging business challenge that encourages creativity, teamwork, and strategic thinking. You'll have the chance to contribute ideas, solve problems, and collaborate with others in a dynamic environment. At the end, you will have the opportunity to ask any questions you have to our traders and HR representatives. Are you fascinated by financial markets and curious about what a career in trading could look like? Come meet us!

## Find your challenge

We are OMP, a leading game changer in **supply chain planning solutions**. The world's largest companies count on our **smart software and services** to optimize their supply chains.

Do you hold a master's degree or PhD in engineering, informatics, mathematics, business engineering, production, or operations management? Together we'll **find or create the job you're dreaming of.**

### Supply Chain Consultant

You equip customers with innovative supply chain solutions, analyze the planning challenges, assist in the solution design, implement and validate the solution, and ensure a smooth go-live.

### User Engagement Consultant

You help our users get the best value from their solution. You provide documentation and training to build planning skills, boost confidence, and improve supply chain planning efficiency.

DISCOVER MORE ABOUT LIFE & WORK AT OMP

Founded in 1979 in a modest Rotterdam attic, SKIM has grown into a **global insight-based consultancy** that empowers brands to elevate their pricing, innovation, and communication strategies with clarity and confidence.

We partner with leading companies—including Philips, Unilever, Google, and Danone—to navigate complexity and drive growth. Our work spans four key areas:

- **Pricing & Revenue Management:** Strategies rooted in behavioral modeling to deliver sustainable, profitable outcomes.
- **Brand Communications:** Messaging that resonates, using proven psychological frameworks.
- **Product Innovation:** Guiding ideas to market with real consumer insight.
- **Advanced Analytics & Modeling:** Translating data into strategic clarity using AI, choice modeling, and simulations.

Our strength lies in combining quantitative and qualitative methods—from mobile testing and DigiShop simulations to the SKIMulator—offering actionable insights based on real-world behavior.

SKIM is powered by over 300 SKIMmers across 11 offices, representing more than 40 nationalities. Our culture encourages individuality, ownership, and collaboration. At the helm are Co-CEOs Karin Lieshout and Joris Huisman, who embody our inclusive, future-facing approach to leadership.

### Innovative

It has been at SKIM's heart that even whilst carrying out state-of-the-art research, SKIMmers still have new

ideas and thoughts that will help our clients even better. The one thing we have learned from the past 45 years is that when bright people have a good idea, giving them the freedom to pursue it is always worth it. What we are saying: we want to hear what your ideas are because those ideas will deliver the quality we strive for.

### People-oriented

We want SKIMmers to feel engaged in their job and to feel they have a platform to grow and discover what they would like to do. That's why we like to base your route, together with you, on your interests and strengths! In the past, we have seen that focusing on these matters unlocks people's true potential and fulfillment in a job. Besides, you are only just starting your career, right? Let's explore what is out there!

### Sounds like something for you?

If all of that sounds appealing to you: great! We would love to meet you. There are a lot of opportunities at SKIM to kickstart your career in Consumer Insights. Whether you would like to do an internship or talk about a full-time position, we would be more than happy to have a chat with you.

### Barista workshop with SKIM:

Curious about SKIM and love a good cup of coffee? Then this event is for you! We're hosting a special barista workshop in collaboration with Rotterdam's own coffee experts, Ketelbinkie.

**For more information about the case, check the SKIM page on our website.**

## Operations Research Drives Sustainability

Are you ready to see how Operations Research can solve complex real-world challenges, improve efficiency, and support the shift toward sustainability? At Ab Ovo, we don't just solve problems we design solutions that drive both environmental impact and profitability for our customers. Our mission is clear: to digitalize operational processes, support sustainability targets, and enhance the profitability of businesses by using resources more efficiently and streamlining workflows. With the rise of Artificial Intelligence, the field of Operations Research is undergoing a rapid transformation. AI enables us to move beyond traditional optimization techniques, unlocking new possibilities for predictive modeling, adaptive planning, and real-time decision-making across complex systems. In our presentation, you will learn how we leverage our expertise to create innovative solutions. With over 25 years of industry knowledge, we recognize that it's not enough to just optimize planning puzzles we're committed to supporting businesses in realizing their sustainability goals.

As a company, we are always enthusiastic about coming up with creative solutions for complex planning puzzles. This is our expertise, and we approach it with a sense of purpose and pride in our work.

## Meet us at the ECD

Join us for an inspiring presentation where you will discover:

- The value of our long-term partnerships and our commitment to helping organizations through continuous transformation.
- Real examples of how Ab Ovo is solving complex planning puzzles.
- Why Operations Research is key to driving sustainability, and how AI enhances its impact.

Whether you're passionate about sustainability, innovation, or solving complex planning puzzles, this presentation will open your eyes to the power of Operations Research.

Interested? Meet us at the ECD 2025.

## Become a Quant at APG

Are you intrigued by the dynamic world of asset management? Do you care about making a positive impact through responsible investing? Are you ready to grow into a leading expert in quantitative investment?

At APG Asset Management, one of Europe's largest and most respected asset managers, you'll have the opportunity to dive deep into the world of quantitative modeling. As a Quant, you'll work on real-world investment challenges that shape the future of sustainable finance – all while being guided by experienced field coaches.

What makes APG unique? We manage the majority of our €600 billion in assets in-house. That means you'll gain firsthand exposure to key areas like Portfolio Management, Trading, Model Validation, and Asset & Liability Management – all under one roof. This is your chance to be part of a purpose-driven organization where innovation, sustainability, and long-term thinking come together. Are you ready to make your mark?

## APG

For pension provider APG, pensions are about people, life, and living together. Through careful asset management, pension administration, communication, and advice, we work towards a livable future for current and future generations. In which we share prosperity and well-being fairly and sustainably. Now, in the future, and later. Together with 4000 employees in Amsterdam and Heerlen, APG is committed to around 4.5 million people in the Netherlands.

## Internships and traineeships

- Our internships are listed here: Internships | Careers at APG. We have working and graduation internships starting in February and September. The vacancies are posted in May and October.
- Trainees start in October every year, the vacancies for the positions open in February: Traineeships at APG | Careers at APG. We offer traineeships for future Quants, Finance and Risk Professionals, and Portfolio Managers.

## About Argon & Co:

Argon & Co Utrecht is a young and vibrant strategy consulting club leading in the field of strategy and digital operations. Our appealing clients mainly operate within (online) retail, manufacturing, mobility and private equity. We support them in order to enable their growth, to improve their economics, and to enhance their customer facing performance. In our projects, we combine in-depth expertise with fact-based analytics. Fast and pragmatic. We work side by side with our clients, from inception to implementation. It is during this process that we come up with our best ideas. For us, it's a sustainable result that's important, not a report.

We are ambitious and have an entrepreneurial spirit. It is our aim to grow significantly in the coming years. Therefore, we are constantly looking for new colleagues with whom we can join forces to further build our consultancy firm. We offer you a challenging experience where you get to decide how steep your learning curve is. Right from the start, your opinion matters. We are passionate about our work, but we also believe in a healthy work/life balance so you can continue to develop yourself outside the workplace, outside the workplace.

## About the Consultancy Dinner:

Curious how your econometrics skills translate into real business impact? At the FAECTOR Econometric Consultancy Dinner you'll get to know Argon & Co Utrecht, a fast-growing strategy consulting firm specialized in strategy and digital operations.

Over dinner, we'll show you how we use fact-based analytics and sharp problem solving to help leading clients in retail, manufacturing, mobility, and private equity tackle their biggest challenges. You'll experience our pragmatic, hands-on approach and discover what it's like to work side by side with clients.

Expect engaging conversations, real-life cases, and an open atmosphere where you can ask anything about our projects, culture, and career opportunities. If you're ambitious, entrepreneurial, and ready for a steep learning curve, we'd love to meet you over dinner!

In een samenleving waarin informatie explosief toeneemt, is het vrij kunnen beschikken over betrouwbare en integrale data cruciaal. Het CBS levert als hét statistische bureau van Nederland met betrouwbare statistische informatie en data inzicht in maatschappelijke vraagstukken. Daarmee voedt het CBS het maatschappelijk debat, de beleidsontwikkeling en de besluitvorming en draagt zo bij aan welvaart, welzijn en democratie.

## Sfeer en cultuur

Het CBS kijkt naar "wat er feitelijk gebeurt". We onderzoeken het en delen onze uitkomsten met iedereen. Voor iedereen en door iedereen dus. Bij het CBS is iedereen dan ook welkom. Wij willen talenten van waarde laten zijn in een omgeving waar je jezelf bent. Dat is niet alleen fijn voor jou, maar ook goed voor ons. Diversiteit brengt immers nieuwe inzichten, kennis en visie in de organisatie.

Het CBS bestaat uit betrokken mensen van verschillende leeftijden, nationaliteiten, seksuele voorkeuren, studierichtingen en loopbanen. Maar we hebben allen één doel: met vakmanschap werken aan een dynamische organisatie die op de toekomst is voorbereid.

Het CBS is een open, transparante organisatie, naar jouw inbreng en mening wordt geluisterd. Met ruim 2000 collega's is het CBS meer en meer een afspiegeling van de samenleving.

Daarbij zetten we de verschillen tussen mensen in als kracht om als teams en organisatie telkens beter te worden. Wij zien er dan ook naar uit dat jij daar, met jouw eigen kijk op de wereld een bijdrage aan komt leveren. Niet alleen in de uitvoering van je werk maar ook als persoon binnen onze organisatie. Met een open blik verwelkomen we daarom de meest geschikte collega op basis van kwaliteit, talent en competenties. Oftewel: "wie er feitelijk tegenover ons zit".

## Stage en afstuderen

Ben je op zoek naar een uitdagende meewerkstage of afstudeerstage? Kijk dan op [www.werkenbijhetcbs.nl](http://www.werkenbijhetcbs.nl)

## Werken bij het CBS

Is je interesse gewekt? Reageer dan direct. Kijk voor onze actuele vacatures op [www.werkenbijhetcbs.nl](http://www.werkenbijhetcbs.nl) Ben jij er klaar voor?

## Presentatie CBS

Benieuwd hoe onze organisatie eruit ziet? Wat voor soort mensen werken er bij het CBS? En met welke vraagstukken houden wij ons dagelijks bezig? Wij nemen je mee om een goed beeld te laten zien hoe het werken bij het CBS is.

## Who we are

Founded in 2020, Clever Republic is a young and dynamic consultancy, specialising in Data Intelligence, Data Governance, and AI Governance. We help organisations transform data into strategic assets, enabling smarter decision-making and long-term success. Our team, consisting of professionals with backgrounds in data, law, business, and economics, is driven by a spirit of innovation and collaboration.

We work with global brands such as Odido, IKEA, ANWB, PostNL, Siemens Energy, and Wacker, offering data-driven solutions that empower companies across industries to stay competitive and achieve their goals. Our approach focuses on unlocking the full potential of data while addressing the complex challenges of a data-driven world.

## Vision and Mission

We believe data is not just a resource but a key driver of innovation and success. Our mission is to help organisations make faster, smarter, and more sustainable decisions using data and we are deeply committed to transparency, accountability, and ethical AI governance.

Our approach is a blend of forward-thinking and practical implementation. We work closely with businesses to develop scalable, sustainable strategies that deliver measurable impact. By pushing the boundaries of Data Intelligence and AI Governance, we empower organisations to navigate the future with confidence.

## Who are we looking for?

As a growing company, Clever Republic is always looking for driven, creative individuals who share our passion for data and technology. passion for data and technology.

Whether you are an economic expert, a tech enthusiast, or a strategic thinker, we offer a unique opportunity to contribute to impactful projects and grow within a fast-paced, innovative environment.

We value collaboration; our team thrives on open communication and mutual support. We are seeking problem-solvers and critical thinkers who are eager to push boundaries and work together to help businesses utilise the power of data. Up until now, we have only hired Dutch-speaking employees. However, as we are looking to expand internationally, we are open to hiring English-speaking professionals.

## Opportunities for Students

At Clever Republic, we believe in the power of fresh perspectives. That is why we actively engage with students and young professionals, offering internships, working student positions, and traineeships that provide hands-on experience with real-world projects. As part of our team, you will work with major clients, contributing to impactful solutions in Data Governance, AI Governance, and ESG reporting. We aim to equip students with the skills, knowledge, and confidence to excel in their careers while making meaningful impact on the world of business and data.

## Clever Republic Case:

Clever Republic invites students to critically explore AI Governance in the telecom sector. The challenge involves developing a governance framework to guide responsible AI use, focusing on predictive models for customer retention. But it is not all theory. **For more information about the case, check the Clever Republic page on our website.**

### About EY:

EY is a global organization with over 400,000 colleagues in more than 150 countries, including 5,500 professionals in the Netherlands. We combine global scale with local expertise to help organizations address their most complex challenges. We are active in Assurance, Tax, Strategy & Transactions, and Consulting. Within Consulting, you can work on projects in Risk, Actuarial Services, AI & Data, and Quantitative Advisory Services, which offer exciting opportunities for students with an econometrics background.

Our colleagues represent many different nationalities, with a 53% male and 47% female ratio, reflecting our inclusive culture where diverse perspectives are valued and collaboration is encouraged. At EY, you can take on meaningful projects, learn from experienced colleagues, and explore different career paths, supported by mentors and professional learning programs.

For students, EY offers a range of opportunities including internships, working student positions, and graduate roles. The application process is designed to get to know you and your potential, typically involving two interviews and an assessment, giving you the chance to demonstrate both your technical skills and personal qualities.

Joining EY means joining a place where you can shape your own career path, contribute to projects in risk, finance, data, and consulting, and see how your skills can make a real difference.

Discover how you can start your career at EY and build your future with confidence on [werkenbijey.nl](https://werkenbijey.nl).

### About the Company Dinner:

During the Econometrics Career Days Company Dinner in Rotterdam, you'll join 15 fellow students for an evening organized by the Econometrics Career Days, with EY present. Over a relaxed dinner, you'll meet colleagues from teams such as Risk, Quantitative Advisory Services, Actuarial Services, and AI & Data, and learn more about their day-to-day work and career journeys.

This is your chance to discover what it's really like to work at EY, from the projects we tackle to the impact we create together. You'll gain insights into the different career paths available to students with an econometrics background and experience the open and collaborative culture that defines EY.

If you're curious about applying your analytical skills to complex challenges in risk, finance, or data, this dinner will give you a clear picture of how you can start your career and build your future with confidence at EY.

Flow Traders is a principal trading firm founded in 2004. We are a leading global technology-enabled liquidity provider, specialized in Exchange Traded Products (ETPs). Flow Traders is at the intersection of finance, cutting-edge technology and scientific research. We are able to grow our organization further, thereby ensuring that our trading desks in Europe, the Americas and Asia provide liquidity across all major exchanges, globally, 24 hours a day. Financial markets have rapidly shifted from trading in the pit to algorithmic trading, and our business model has made us an entrepreneurial and competitive firm in the FinTech space. We use our principal technology platform to quote bid and ask prices in thousands of ETP listings. We are also active in other asset classes such as bonds, FX, cryptocurrencies and similar financial products. On top of that, we provide liquidity to institutional counterparties off-exchange across all regions!

Flow Traders stays ahead of the competition by focusing on technology and niche competencies in markets where every second counts. This requires access to the best information and the ability to respond instantly. To achieve this, our team of software developers works in partnership with experienced traders to identify and execute tomorrow's strategies, making Flow a daily pioneer in professional trading.

### Who we are

Flow Traders is a leading global technology-enabled liquidity provider in financial products. Founded in 2004, we continuously growing our team and organization, expanding our product offering, large counterparty network and trading capabilities to ensure that our trading hubs in Europe, the US

and APAC can provide liquidity across all major exchanges and trading platforms, globally, 24 hours a day. Our culture is unique. We are entrepreneurs at heart and drive innovation across financial markets. We are a team of passionate, creative minds working together across multi functions and countries.

### What we do

We are a technology company operating in global financial markets, using our proprietary technology platform to quote bid and ask prices in thousands of financial products. We also provide liquidity in financial products, historically with a focus on exchange-traded products (ETPs). We do this globally; enabling investors to buy and sell ETPs efficiently by quoting bid and ask prices under virtually all market circumstances. In recent years, we have diversified the products we trade, now including Digital Assets, Fixed Income, Commodities and Foreign Exchange (FX).

### Wanna learn more?

The best way to get to know us and our core business is by joining one of our events (in-house days, E-House days etc.) Our recruitment events are great opportunities to build up your knowledge of the business, and meet and establish relationships with Flow Traders colleagues.

### Flow Traders case

Join Flow Traders at the ECD for a dynamic session on Microsoft's acquisition of Activision Blizzard. Explore the strategic impacts on the gaming industry and market reactions. Collaborate and enhance your analytical skills in this engaging real-world case study!

## Company profile

Gibbs is a data analytics consultancy based in Rotterdam. We help ambitious organizations advance both strategically and practically with a straightforward, no-nonsense analytic approach. Our work centers on making business processes and decisions data-driven, ensuring that customer and operational insights are fully utilized. Many of our projects focus on optimizing marketing strategies, forecasting, and identifying cost-saving opportunities. We work across a variety of industries, serving clients like KPN, Blijdorp, Olympia, and the CBR. Our small teams typically work on projects that last several months, and we prioritize working closely with clients on-site whenever possible. This ensures that every project is customized to meet each client's specific needs – no two projects are ever the same.

## Opportunities

Working at Gibbs comes with some great perks, including an office view of the Coolsingel, the support of a close-knit team that prioritizes maintaining a healthy work-life balance, many social events, and knowledge-sharing sessions. Each year, we offer a number of consultancy internships, and we typically hire around two new junior consultants. We provide consultancy internships for students completing their master's in econometrics, particularly in tracks such as Business Analytics & Quantitative Marketing, Analytics and Operations Research in Logistics, and Econometrics.

During the internship, you will work on a dedicated thesis project for one of our clients, while also contributing to other Gibbs-projects as part of a project team. This combination offers both the opportunity to conduct in-depth research and to gain hands-on experience in analytics consulting. With guidance from one of our senior consultants, you will balance your thesis assignment with project work, experiencing both the academic and practical sides of consulting within seven months.

As a junior analytics consultant at Gibbs, you will work in teams on assignments for a variety of organizations, both on-site with clients and at Gibbs' office. In your first two years, you will follow our internal training program, which includes a mix of technical and soft skills development. You'll participate in modules covering SQL, PowerBI, presentation skills, and consulting techniques, among others.

We are looking for students who are passionate about data and skilled in building quantitative models. You should enjoy the challenge of translating insights into actionable recommendations for clients and have strong communication skills to effectively present your findings. Since most of our clients are Dutch, fluency in Dutch is required.

If you don't get a chance to meet us during the Econometric Career Days, feel free to reach out – we would love to hear from you!

Gupta Strategists is an independent Dutch consulting firm specialized in healthcare. We work with hospitals, insurers, governments, and other healthcare organizations to help them navigate complex challenges, from improving patient care to managing costs and preparing for future developments. What makes us unique is our exclusive focus on healthcare, combined with a highly analytical yet creative approach. We are known for tackling tough problems with data-driven insights while also translating them into practical and sustainable solutions.

Our core values shape everything we do. We value impact, ensuring our work creates meaningful improvements in healthcare. We believe in independence, both in thought and in action, which allows us to give clients honest advice without compromise. Excellence is central to our work: we set high standards for the quality of our analysis and the clarity of our communication. Finally, we foster curiosity and collaboration—we are eager to learn, to challenge assumptions, and to work closely with clients and colleagues.

Looking ahead, our vision is to continue shaping the future of healthcare by helping organizations adapt to rapid changes. Demographic shifts, technological innovation, and financial pressures are transforming the sector.

Gupta Strategists strives to be at the forefront of these developments, enabling healthcare systems to remain accessible, affordable, and of high quality.

We are always looking for talented people who share our passion for healthcare and problem-solving. Our team is diverse in background, with consultants coming from medicine, economics, engineering, and beyond. We have open positions all year. The recruitment process consists of multiple case interviews. Throughout the process, we aim to give candidates a clear picture of our work and values, while also getting to know them as individuals.

### Gupta Strategists Case

In the case, you will work with a Polish health insurer. This insurer has been operating at a loss for several years, even though the number of insured members continues to grow. Using data about the insurer and the healthcare system in Poland, you will investigate how the company can turn the tide and return to profitability.

IG&H

## About IG&H

Since 1988, IG&H has been accelerating the digital transformation of organizations in Healthcare, Retail, and Financial Services. What sets us apart is our unique ability to combine deep sector expertise with strategy, technology, and data to create real business impact. Where many stop at advice, we go further: from strategy to implementation, from technology to managed services. Our promise is clear: Make Strategy Work.

With more than 650 professionals – consultants, developers, data scientists, and transformation experts – we bring together diverse capabilities under one roof. By leveraging proven low-code technologies and innovative digital solutions, we help our clients stay relevant, adapt to disruption, and lead in their industries.

## Our Core Values

At IG&H, our culture is defined by being both high daring and high caring. We dare to challenge the status quo, take bold steps, and think beyond conventional boundaries. At the same time, we deeply care for our people, our clients, and society. This balance creates an environment where trust, growth, and innovation thrive. We believe in working side by side with our clients, building lasting partnerships, and creating tangible results that matter.

## Our Vision for the Future

The pace of change in Healthcare, Retail, and Financial Services will only accelerate. Digital ecosystems, AI-driven insights, and platform solutions are reshaping how organizations operate and connect with their customers. At IG&H, we envision a future where

organizations not only keep up but lead by harnessing the power of strategy and technology together.

Our ambition is to be Europe's leading partner in sector-driven digital transformation – enabling organizations to reinvent themselves, unlock sustainable growth, and deliver meaningful impact to society. By continuously investing in talent, technology, and innovation, we ensure that our clients are always one step ahead.

At IG&H, we don't just talk about transformation. We make it work.

## Consultancy Dinner with IG&H

At IG&H, we believe the best way to learn about consultancy is to experience it firsthand. During the Consultancy Dinner, you'll meet our consultants and discover how we combine strategy, sector expertise, and technology to help leading organizations in Healthcare, Retail, and Financial Services transform and grow.

Expect honest insights into the world of consultancy: from the impact you can make as a young professional to the steep learning curve and the collaborative, supportive culture that defines IG&H. Our high daring, high caring mindset means we challenge each other to think big, while always looking out for one another.

Curious about how your ideas can shape the future of business and technology? Come join us at our table, we look forward to meeting you!

### Working at ING

Every year, more than 350 students, join ING for an internship, either to work along or write their thesis. Most internships are for 36 hours a week in Amsterdam. Graduated and not sure what you want to do yet? Join our two year traineeship: The International Talent Programme (ITP). You will get to explore multiple departments through 3 rotations of which you can even do one abroad. Afterwards, you start in your permanent role. There are 9 tracks you can apply for: Analytics, Tech, Risk, Operations & Change, Wholesale Banking, Business Banking, Retail Banking, Finance and HR. Most econometric alumni end up either in the Analytics or Risk track of the ITP.

You can find more information about internships the ITP and starter positions on our career website. Go to [ing.nl/careers](https://ing.nl/careers).

## About KPMG

### Who we are

KPMG Netherlands is part of a global network of professional firms providing Audit, Tax and Advisory services. With over 4,100 employees in the Netherlands in 12 offices, we contribute to progress that benefits people and society.

### What we do

We help our clients achieve the growth and/or progress they aim for. Combining the latest technologies with what we have built up in the past century at KPMG: a foundation of knowledge, expertise and independent thought. Everything we do is based on the KPMG values: Integrity, Excellence, Courage, Together and For Better.

### Culture

You will encounter an open and informal culture. A stimulating mix of entrepreneurship, creativity and team spirit. You can be yourself, feel appreciated and know that you can make a difference. At KPMG you are given a lot of responsibility early on and the freedom to develop yourself. Both professionally and personally. You will grow rapidly thanks to the diversity of engagements and the innovations you are involved with.

### Inclusion & Diversity

We strive for a working environment where everyone feels involved and valued, and where there is room for all employees, regardless of origin, age, gender or disability. A diverse and inclusive culture leads to more trust, more growth and helps us stand up for what is right.

## Corporate Responsibility

We have a high responsibility towards society. We believe it is important to give something back to society and focus on corporate responsibility. Every day we work towards a sustainable and fair world. Whether it concerns complex issues within our monitoring and consultancy work, thinking about a new mobility policy or stimulating innovation within education.

### KPMG Case

During our case at the Econometric Career Days, you'll dive into the world of asset management and pensions—two rapidly evolving domains that demand smart, data-driven solutions. You'll work on a realistic business case where you apply your analytical skills to tackle complex financial challenges, such as optimizing investment strategies or assessing long-term risks within pension portfolios. Together with fellow students, you'll develop practical solutions that combine quantitative models with strategic insight. You'll experience what it's like to operate as a consultant within a multidisciplinary team and learn how to translate data into impactful advice for clients. In addition, you'll have the opportunity to connect with our professionals, ask questions, and discover how your background in econometrics or finance aligns perfectly with the projects we work on at KPMG.

## About Milliman

Milliman is one of the largest independent consulting firms in the world in the fields of actuarial consulting, financial risk management, and data science. Originally founded in 1947 in Seattle, Milliman now has more than 4,000 employees across 59 offices worldwide.

In the Benelux, you can find us in Amsterdam, Brussels, and Luxembourg. Here, we work with over 50 smart and motivated consultants with one goal: solving challenging problems for our clients. Whether that's an insurer, bank, healthcare institution, or corporate, we contribute at the highest level. Our projects are just as diverse as our team. From building pricing models for insurers to analyzing risks at investment firms, advising on healthcare financing, or guiding M&A processes in the financial sector. In addition, we are actively engaged in the latest developments in data science and AI.

## Beertasting

Experience the delicious Beertasting event with Milliman! Discover our expertise as a financial and actuarial consultancy firm while enjoying delicious beers. Connect with us, ask questions about our clients, culture, and future education opportunities. We're thrilled to provide all the answers you need. Don't miss this opportunity to meet us and savor great brews. Be there or B<sup>2</sup>!

## About NN Group:

We are NN Group, a leading international financial services company headquartered in the Netherlands. With a history dating back to 1845, we serve over 19 million customers across 10 countries, offering a broad range of products and services in insurance, pensions, banking, and asset management. Our brands, including Nationale-Nederlanden, ABN AMRO Insurance, Movir, AZL, BeFrank, OHRA, and Woonnu, are well-established in the markets where we operate.

What makes us unique in the sector is our customer-centric approach, our long-standing heritage, and our commitment to creating sustainable value. We combine deep local expertise with international best practices to deliver solutions that meet the evolving needs of our customers. In the Netherlands, we are a market leader in life insurance and pensions, and we hold top-three positions in Central and Eastern Europe.

Our core values – **Care**, **Clear**, and **Commit** – guide everything we do. We care for our customers, communicate clearly and transparently, and commit to their long-term financial well-being. These values also shape how we work with colleagues, partners, and society at large.

Our vision for the future is clear: we aim to help people care for what matters most to them. That's why we invest in digital innovation, sustainability, and inclusivity. We strive to make a positive impact on society

by promoting financial well-being, supporting communities, and reducing our environmental footprint.

At the moment, we have several internship positions available. The vacancy for our traineeship will be published online in February 2026. The application process for the traineeship begins with an online assessment, followed by an online interview. The final stage is the Talent Selection Days, during which you will spend a day at our office and participate in various assessments.

We place great value on diversity and are looking for individuals who share our values and want to contribute to a meaningful future.

For more information about our vacancies and the application process, please visit our careers page: <https://www.nn-careers.com/en/>

## About the Case:

For the students with a quantitative background NN made a fun game! The student will be the CFO of a large insurance company and have to make all the decisions.

What do you need? Quantitative insight, learning ability and... a bit of luck

# ORTEC

ORTEC

## About ORTEC

We are ORTEC, a purpose-driven organization changing businesses and society at large through the power of data-driven mathematical optimization. We make businesses more efficient, more predictable and more effective. Turning complex challenges into easy-to-use solutions.

ORTEC's products and services result in optimized fleet routing and dispatch, vehicle and pallet loading, workforce scheduling, delivery forecasting, logistics network planning and warehouse control. ORTEC offers stand-alone, custom-made and SAP® certified and embedded solutions, supported by strategic partnerships.

We serve clients in almost every industry. And with 17 offices strategically located across 4 continents, we can deliver solutions on a global scale. Always underpinned by local know-how and service.

## Working at ORTEC

ORTEC is an ambitious organization. Since our founding in 1981, we have grown to employ over 1100 people at locations in Europe, the United States, Australia and Brazil. Most of our employees began working with us after completing their studies.

The average ORTEC employee has a technical master's or bachelor's degree, a strongly developed capacity

The company's organizational structure is flat, with short lines of communication. The atmosphere is open and informal, which forms an excellent basis for a productive working environment.

You are invited to attend social activities organized by our employees' association, and the Friday afternoon drinks in our own ORTap. Furthermore, an excursion for your department or ORTEC as a whole is organized annually, such as the Christmas breakfast or a barbecue at one of the founders' homes. And in addition to the (Young) Professionals Development Program, each month Young ORTEC organizes activities to help develop your talent, increase your knowledge and expand your network.

## Students and starters

We are always looking for ambitious students/starters who have affinity with IT, optimization and logistics. As a student you can do a graduation internship at ORTEC and as a graduate we have traineeship positions available or other junior positions.

Please have a look at our career page for the current vacancies: <https://ortec.com/en/careers/find-jobs/jobs>.

If you are interested in working at ORTEC, you can send your resume, motivation and grades list to [recruitment@ortec.com](mailto:recruitment@ortec.com).

Do you want to work with smart, helpful and driven colleagues? Do you want a substantive challenge and learn a lot? Then Ortec Finance is your place!

Working at Ortec Finance means working in an organization where long-term (customer) relationships are central. An environment in which colleagues are willing to help each other and customers. We offer you an organizational culture in which you can develop and get the best out of yourself. The culture is informal, flat and friendly. But also innovative: how can we jointly make our customers' work – but also our own work – better, more efficient and easier? Good ideas are always welcome. We give you every opportunity to develop your talents and applaud entrepreneurship.

Ortec Finance is the leading provider of risk and return management technology and solutions. Our goal is to empower people to manage the complexities of investment decisions. We do this by delivering industry-leading investment decision technologies and solutions to financial institutions around the world. Municipalities and tax collaborations are also among our clientele. Our strength lies in an effective combination of advanced models, innovative technology and in-depth market knowledge.

Our head office is located in Rotterdam. We also have offices in Amsterdam, London, Toronto, Zurich, Singapore, New York and Melbourne.

- 20+ countries represented
- 500+ customers
- 96% retention rate

- 3 trillion euros in assets under management of our clients

### During your studies:

At Ortec Finance you can gain experience as a student assistant during your studies. This is possible from 1 day a week. You can also graduate with us. We also offer you the opportunity to do both at the same time!

### On is the study:

Ortec Finance is always looking for smart, driven colleagues with good ideas. Most people work for us as software developers, information analysts, business analysts, quantitative financial analysts and consultants. But please contact us to explore together what suits you. Where your talents come into their own and you can develop.

### How do I get in touch?

If you are interested in what opportunities Ortec Finance has to offer you during or after your studies, please contact us via telephone number 010 – 700 –50 00 or by e-mail [recruitment@ortec-finance.com](mailto:recruitment@ortec-finance.com)

On our vacancies page <https://www.ortecfinance.com/vacancies> you will find all current vacancies and thesis topics. If a vacancy or graduation topic appeals to you, we would like to invite you to apply via the application button. We will contact you as soon as possible.

### We hope to meet you soon

### Company text

At Picnic, we're building the modern milkman – delivering groceries to millions of people across three countries. And we're one of the only companies in the world to do it all by ourselves. From our fully automated warehouse to our delivery algorithms – it's all built by our own people. We find it gives us more freedom when it comes to trying out new and innovative ideas! To do this, we need ambitious, entrepreneurial and creative people who know how to handle data.

Our goal is to revolutionize the way people do groceries every day. Ready to get on board?

Please DO NOT APPLY if...

- You are looking for a fancy corporate environment – we are not that! We're all about embracing the chaos and finding our own path to success.
- You prefer to stick to the sidelines and follow orders – we are not that! Here, we're all hands on deck, driving change, and shaping the future together.
- You're more comfortable in a corporate setting with established hierarchies – we are not that! Here, everyone's voice matters, regardless of title or tenure.

So, are you ready to be a game changer? Check out our analytics opportunities: <https://jobs.picnic.app/de/strategy-analytics>

### Picnic case

At Picnic, we like to do everything just a bit differently. Doing our own analyses, writing our own software and co-developing our own vehicles for example. To do this, we need ambitious, entrepreneurial and creative people who know how to handle data. Because for our work, you not only need to analyse challenges, we also expect you to think about solutions and present conclusions in a clear and concise manner.

During the case, all these elements will come together, as we will show you how one of our many interesting projects would look like. You will get data, brainstorm about the best approach, work together to find answers and present your findings in our Picnic format. You will have the chance to show that you can take responsibility on a topic, and steer how we should tackle it.

In the course of the case, you will also learn about the different teams and operations within Picnic, for example our Commercial side (buying and creating our assortment), Supply Chain (optimizing operations and logistics) or Business Development (new ideas and markets). Do you have what it takes to tackle our next challenge? Join the Picnic case!

Portwise was founded in 1996 as part of TBA Group and has been independent since 2022. We are a world-leading consultancy and simulation firm for logistics in ports, terminals and warehouses. We stand for progress and impact; we work mission-driven and help transform logistics to become future and planet proof. We do this with a mindset of curiosity and creativity, together as a team and with our clients and other stakeholders in the logistic chain. Above all, we love our work. We use our state-of-the-art models, expertise, and skills to make a positive impact on business, people, and planet.

## Our core values are:

- Progress drives Portwise forward as a company, constantly pushing the boundaries of what's possible and inspiring us to achieve more - for our customers as well as ourselves.
- Creativity is at the core of everything we do, allowing us to think outside the box and create innovative software tools and simulation models to complex challenges.
- Curiosity encourages us to ask questions and challenge the status quo in a world where logistics can be smarter, more efficient and more sustainable.
- Togetherness. We value togetherness and believe in the power of collaboration, teamwork, and unity to achieve our goals and create a positive work culture.

Logistics is vital to our prosperity and well-being. However, transporting goods around the world comes with drawbacks. The volume and the way

we move goods globally have a major impact on our planet. We see that the various links in the logistic chain are under pressure which makes the total system vulnerable. The way in which all links are connected creates great interdependence and inefficiency. There are still a lot of efficiency gains to be made in global logistics. We use models, tooling and expertise, to design smarter, more efficient and more sustainable ports and terminals for futureproof logistics around the world.

Zijn er op dit moment openstaande vacatures? Zo ja, hoe ziet het sollicitatieproces er globaal uit?

Zie de website: <https://www.portwiseconsultancy.com/about-portwise/careers/>.

## About the Case:

In Portwise's case, you will work in teams to design the most profitable terminal, based on input data such as vessel specifications, call sizes, service agreement, crane productivities, costs, and much more. Simulation results can be used to improve your initial design. Make sure you have enough cranes and berthing space to service all incoming vessels in time, otherwise you must pay penalties to the shipping line. On the other hand, the quay wall and cranes are not cheap. There can only be one winner!

## Meet us at the ECD:

### Case

- Tuesday 18 November
- Morning 09:00-13:00

PwC is a leading professional services firm with a presence in over 150 countries. We help organizations navigate complex strategic, financial, and technological landscapes. Our diverse and dynamic team collaborates globally across three core Lines of Service: Assurance, Advisory, and Tax, Legal & Workforce. At PwC Netherlands, diverse and ambitious people from various offices and backgrounds work together. Our team, Risk Modelling Services and Pensions combines actuarial and quantitative consulting to help our clients with challenging problems. We operate from our offices in Rotterdam, Amsterdam, and Utrecht.

Emerging disruptions (AI, climate change, geopolitical and demographic uncertainty, etc.) introduce both risks and opportunities to our clients. The Risk Modelling Services and Pensions team supports them with modelling solutions. We analyze potential impacts of future events on organizations to help them anticipate and optimize decision-making.

Our support focuses on insurers, banks, pension funds and government agencies. We offer strategic advice based on quantitative exercises.

- These quantitative exercises include: Analyzing complex claims or credit patterns.
- Simulating balance sheets, asset mixes, or capital requirements.
- Introducing AI to optimize customer support or the identification of large events.
- Estimating impacts of pension strategies in the Dutch pension system transition or financial structures for risk-sharing.

## Career & Thesis Opportunities

We offer a working student position in Actuarial and Quantitative Consulting within our team for 2 or 3 days a week, over a period of 6 months starting from November 2025 (or later, if necessary). You will work on assignments for actual clients, or assist the team in developing new propositions. The success of the team depends on your analytical insights, your communication skills, and your creativity in generating new ideas. During the remaining days of your week, you can work on your master's thesis. We provide a buddy, coach, and thesis supervisor for PwC-related thesis topics. It is important to note that we do not offer thesis internships exclusively; they are only offered in combination with a working student position.

## Case info

Pension is more relevant than ever, especially with the introduction of the new Dutch Future of Pensions Act (Wet toekomst pensioenen, Wtp). In this interactive pension case, you will dive into the upcoming changes in the pension system. You will explore what exactly is changing and why it matters for the future.

**For more information about the case, check the PwC page on our website.**

We are SINCERIUS, a pioneer in data-driven due diligence. Our dedicated team delivers next-level transaction services and supports clients throughout every stage of the investment cycle with Financial Due Diligence, Business Insight, and Performance Improvement. We act quickly, assess risks with care, and highlight the matters that truly require attention. Our solutions-oriented mentality and transparent approach consistently translate into clear, high-quality outcomes.

At SINCERIUS, you can be open, honest, and ambitious. We foster a professional yet supportive culture that encourages continuous development and personal growth. This creates a safe and stimulating environment where you can make an impact from the outset. Hands-on. Spot-on. Sincere.

### Our Services

- Financial Due Diligence – Each year we complete around 150 due diligence projects, primarily for Private Equity clients, providing insights into risks and opportunities to support negotiations.
- Business Insight – Our in-house team builds dashboards that give clients real-time insights into financial and operational performance, while also enhancing our due diligence work.
- Performance Improvement – By combining experience and fresh perspective, we identify opportunities to unlock value and deliver substantiated, actionable advice.

### The SINCERIUS Way of Working

Working at SINCERIUS means continuously growing and developing. You gain hands-on experience from day one, supported by the guidance of senior colleagues. Alongside this, you will participate in our innovative training

at SINCERIUS you are encouraged to be open, honest and authentic, while also pursuing your own ambitions and initiatives. Together, this creates a supportive environment in which you can work and learn with a steep learning curve.

### Our Clients

We advise national and international clients with a strong focus on Dutch Private Equity, serving firms such as Mentha Capital, Committed Capital, Capital A, Nedvest, and AXECO. Our reputation is underlined by multiple M&A Awards, including 'Best Transaction Services Firm Mid-Market' in 2023 and 2024.

### Vacancies

Do you recognise yourself in the following profile?

- You have a background in Finance, Accounting, Econometrics or another quantitative field.
- You are a current or recently graduated Master's student.
- You are passionate about the analytical side of M&A.

If so, discover our opportunities at <https://sincerius.nl/nl/vacature>

### Dinner

Wil jij ontdekken hoe het is om te werken in Financial Due Diligence bij SINCERIUS? Schuif dan aan bij ons diner, maak kennis met onze collega's én verken de wereld van M&A.

**For more information about the dinner, check the SINCERIUS page on our website.**

SiRM is a strategic consultancy. Our goal is better healthcare that remains accessible and affordable. In 2024, we added our energy mission: contributing to a sustainable energy system that remains reliable and affordable. With our carefully substantiated advice, we empower administrators and policymakers to define their strategy. We carry out our mission with a close-knit and ambitious team with diverse backgrounds and talents. SiRM offers a challenging and inspiring work environment with top-level strategic consulting assignments. Socially relevant work with real impact.

### Work with impact

We combine the expertise of strategic consulting with in-depth knowledge of the healthcare and energy sectors. With our well-substantiated advice, we empower administrators and policymakers to define a sustainable strategy or develop sustainable policy. We have a strong analytical approach and, where possible, prefer to provide concrete results. We also use qualitative research methods, such as interviews and workshops.

Our clients span all healthcare and energy sectors and include healthcare providers, health insurers, manufacturers, grid operators, government agencies, and industry organizations. We provide independent advice, and the societal perspective is always our starting point.

### Enthusiastic colleagues

At SiRM, you'll work with eager and ambitious colleagues in a close-knit team. The atmosphere is collegial and informal. Our diverse backgrounds and talents mean we complement each other well and learn a great deal from each other. Where necessary, we support each other to achieve the best possible results for our clients. This close collaboration is the core of our success.

### Want to meet?

Are you interested in strategy consulting, healthcare, or the energy sector? You're very welcome to get acquainted. We're always looking for motivated colleagues or research interns who are eager to learn and focused on quality.

Contact Pam van der Meer at [pam.vandermeer@sirm.nl](mailto:pam.vandermeer@sirm.nl) or 06-4207222.

# Sprenkels

## Sprenkels

*This event is only accessible for Dutch speaking students*

Bij Sprenkels zijn wij dagelijks bezig om complexe vraagstukken op het terrein van actuariaat en beleggen terug te brengen tot de kern. We gebruiken onze expertise en ervaring om onze klanten, te voorzien van een data-gedreven strategie. Wij werken met state-of-the-art kwantitatieve modellen aan innovatieve oplossingen.

Bij Sprenkels zijn we vindingrijk en nieuwsgierig. We zijn altijd op zoek naar uitblinkers die willen werken in een dynamische en uitdagende omgeving. Wij staan open voor de knapste koppen uit kwantitatieve disciplines, op zoek naar een rol met écht impact. Bij ons krijg je direct veel verantwoordelijkheid en werk je op het scherpst van de snede. Je groeit bij Sprenkels zo snel als je zelf aan kunt. Omdat wij geloven dat je sneller groeit zonder uitgestippeld pad.

Als consultant werk je mee binnen ons unieke bedrijfsmodel waarin ondernemerschap voorop staat. Samen met zo'n 100 ambitieuze collega's werk je rechtstreeks voor onze klanten. Je werkt op ons kantoor in Amsterdam of Rotterdam. Daarnaast krijg je flexibiliteit om hybride te werken. Onze consultants hebben veelal een achtergrond in econometrie, actuariaat of wiskunde.

Nieuwsgierig? Wij ook! Neem contact op met Marieke Klein:  
06 55 530 249

werken@sprenkels.nl

Actuariaat | Communicatie | Employee benefits | Investment | Legal | Riskmanagement | Transitie- en projectmanagement

### Over de Case:

Tijdens onze sessie geven we een beeld van onze strategische vraagstukken. De pensioenhervorming is één van de grootste herverdelingen van kapitaal in de wereld. Dit raakt alle aspecten van onze sector. Hoe beslis je of een fonds ophoudt met bestaan? Hoe geef je het nieuwe beleid vorm? Hoe communiceer je met je deelnemers? We nemen je mee langs de vragen waar de grootste fondsen van Nederland voor staan.

Sprenkels is een strategische adviseur voor veel van deze fondsen en helpt institutionele beleggers om hun doelen te halen. De consultants van Sprenkels passen hun kwantitatieve achtergrond toe om klanten zo goed mogelijk te adviseren. Wij gebruiken econometrische technieken om bijvoorbeeld de prijs van een complexe optiestructuur te bepalen of de impact van een klimaatbewust beleggingsbeleid vast te stellen. In de case bouwen we op jouw analytische skills om allerlei strategische uitdagingen uit de praktijk op te lossen

### Wie is Triple A – Risk Finance?

Triple A – Risk Finance is een onafhankelijk en innovatief consultancybedrijf gespecialiseerd op het gebied van actuariaat en risicomanagement, opgericht in 2006 en gevestigd in Amsterdam. Triple A is een bedrijf met een platte structuur en enthousiaste jonge professionals. Mede door de korte lijnen met het management is er volop ruimte voor eigen inbreng en verantwoordelijkheid. Dit geeft onze medewerkers de kans om buiten de geboende paden te gaan en de vaak kwantitatief uitdagende opdrachten met een creatieve benadering op te lossen.

### Wat doet Triple A – Risk Finance?

We werken vanuit de business lines: Pensions, Insurance, Risk & Strategy Consulting, Banking, Actuarial Technology en Data Analytics. Onze klanten variëren van grote multinationals tot kleine ondernemingen onder te verdelen in banken, verzekeraars, pensioenfondsen, pensioenuitvoerders en werkgevers. We werken vanuit ons eigen kantoor, thuis en op locatie bij de klant.

Voorbeelden van werkzaamheden zijn onder andere:

- Ontwikkeling van actuariële projectiemodellen
- Uitvoering van risicoanalyses
- Prijsstelling van schade- en inkomensverzekeringen
- Advisering over nieuwe pensioenregelingen
- Asset & liability management
- Ontwikkeling van krediet- en marktrisico modellen

Een standaard carrièrepad bestaat dan ook niet binnen Triple A. Je ontwikkelt je als risk professional met je eigen accenten. Kortom, we bieden uitgebreide mogelijkheden tot een zeer uitdagende carrière in de consultancy op het gebied van actuariaat en risicomanagement.

### Hoe is de werksfeer bij Triple A – Risk Finance?

Triple A – Risk Finance is een jong en dynamisch bedrijf. Dat geldt zowel voor het bedrijf zelf, als voor de mensen die er werken: de gemiddelde leeftijd van de consultants ligt rond de 33 jaar. Het bedrijf is volop in ontwikkeling en bestaat uit een team van zo'n 160 mensen. Het is het gevoel van de unieke dynamiek binnen Triple A: een gevoel van ondernemerschap en vastberadenheid om samen ergens voor te gaan. De dynamiek vind je binnen het hele bedrijf terug in de manier van werken en de sfeer op kantoor. De omgang met collega's is open en informeel, en tegelijkertijd gaan we met z'n allen voor het beste resultaat.

### Meer weten?

# valcon

*This event is only accessible for Dutch speaking students*

Valcon is a full-service provider that works at the intersection between consultancy, technology, data, advanced analytics and strategy. Situated in The Netherlands, The United Kingdom, Denmark, Sweden and Germany, Valcon forms a North-West European

helping clients across national borders. With over 1000 colleagues, we focus on end-to-end transformations in which we create long-lasting and sustainable value together with a human approach.

We know that every link matters in improving a company's value chain. We support our clients in pursuing the right change in people, system, and process. Our involvement is based on deep knowledge and experience, working shoulder to shoulder with many different organisations. We do not blindly follow a methodology; we follow through on getting things done.

No matter where you are on your path into the future, we hope that our paths could join. We are passionate about bringing our clients into the future, but pragmatic when it comes to methodologies. How we deliver is as important as what we deliver. We are doers who think. Are you also passionate about making a difference, pragmatic when needs to be and just overall a great human being? Then we would love to hear from you.

Contact: [recruitment.nl@valcon.com](mailto:recruitment.nl@valcon.com)  
Headquarters: Utrecht  
Website: [www.valcon.com](http://www.valcon.com)

## The Core Values of Valcon Integrity

We are honest, transparent and dare to be authentic. We have respect for each other and our clients and take responsibility for what we do: the promise, the process, and the impact.

## Together

We co-create solutions with our clients, by working in high performing teams built on diversity, respect, and trust.

## Joy

We enjoy our work and promote a positive environment. We are passionate and love to take on challenges.

## Can do

We are bold in our belief that nothing is impossible. We approach every task with a positive, ambitious yet no-nonsense attitude to realize sustainable solutions for our clients.

## Curious

We are humble about what we know and always ask questions. We strive to learn and welcome feedback to deepen our understanding, support growth and uncover new, and innovative solutions.

## About the Case

The Sneaker Factory is een innovatieve sneakerfabrikant die zich richt op duurzame productie met 0% afval en voor elk verkocht paar een boom plant. Hoewel het bedrijf sterk groeit, ontbreekt het de bestuursleden aan duidelijke inzichten in welke producten, winkels en verkopers het best presteren. Zij hebben daarom gevraagd om ondersteuning bij het verkrijgen van heldere en datagedreven inzichten in de prestaties van hun producten, winkels en medewerkers, zodat zij onderbouwde strategische beslissingen kunnen nemen.

- Afternoon 14:00-18:00

## VAN LANSCHOT KEMPEN

For nearly three centuries, Van Lanschot Kempen has been an independent wealth manager, specializing in private banking, investment management, and investment banking. Our long history defines who we are, as it has given us a true understanding of the value of time. We view wealth as a matter of generations rather than quarters, and we are committed to sustainable, long-term growth. Throughout this time, our clients have always come first. That's why we ask them: How would you like to spend your time?

We manage around €149 billion in assets (as of 31 December 2024) and employ about 2,200 people. Van Lanschot Kempen shares are listed on Euronext Amsterdam.

Our core values are:

- Personal: We build lasting relationships with both our clients and our colleagues.
- Specialized: We focus on a select range of services and have deep expertise in these areas.
- Entrepreneurial: We encourage innovation and growth, both for our clients and within our firm.
- Decisive: We make clear, long-term choices—and we stand by them.

We regularly hire (thesis) interns and working students with a quantitative background, particularly in our Financial Risk Management domain. Additionally, we recruit several interns for our Quant team on the trading floor. Looking ahead, we expect to launch a Finance & Risk Traineeship in September 2026, with recruitment starting in spring 2026.

For all of these positions, you can apply with your CV. Applicants will be invited to complete an assessment to measure both cognitive and behavioral skills. Successful candidates will be invited to our offices for interviews that focus on both motivation and technical ability.

We look forward to meeting you at the ECD!

## zeb – Shape Spaces in Financial Services

zeb is one of Europe's leading strategy, management, and IT consultancies focused on financial services. We support banks, insurance companies, and (tech) service providers in developing new business models, driving digital transformation, managing risk, and optimizing IT. Our expertise spans strategy and organization, finance and risk, and IT consulting. We combine deep professional knowledge with technological expertise, social competence, and creativity.

### #ShapeSpaces

"Shape Spaces" reflects the heart of zeb's culture: shaping the future. With courage, expertise, and creativity, we drive transformation in the financial sector. We seek people who overcome boundaries, embrace change, and spark enthusiasm in others.

### #Bemultiversal

We work multiversally—always and without exception. In complex situations, we thrive. We explore, experiment, and expand horizons. Why? Because we have the courage to make mistakes in order to learn from them and grow stronger.

### #Divedeep

Even in times of transformation, one thing stays the same: we dive deep. We want to understand thoroughly, examine from all angles, and give everything we do our full attention. We approach people and topics with curiosity and care.

### Your Career at zeb

At zeb, your development is our focus. We listen to what you have to say. We believe in "reasoning beats hierarchy" and encourage open dialogue and critical thinking. Our "stay and grow"

approach offers long-term growth opportunities. You'll be part of a strong team and a vibrant community—because collaboration is key to our success.

### Application Process

Our process typically takes six weeks. After receiving your application, our Talent Attraction Team reviews your documents. For entry-level roles (Consultant/Analyst), the next step is an online assessment center. For other positions, we invite you directly to interviews. In the interviews we want to find out whether your professional profile and your personality will fit in with us. In the expert interview, you'll work through a case study that reflects typical zeb tasks. We want to see how you structure and solve complex problems. You'll also have the chance to ask questions and get to know us better. After the interviews, we share feedback by phone. If everything aligns, your employment contract will arrive by post a few days later. Ready to shape the future of finance? We'll give you the opportunity. Explore our job openings on our website.

### About the case

Join zeb's session if you are interested in Consulting and/or Finance. You will have the opportunity to learn about market sizing, risk modeling, story lining, and pitching your best ideas. The case you will be working on is based on one of zeb's recent projects and focuses on the role of banks in the energy transition.

**For more information about the case, check the zeb page on our website.**

Internship positions

Econometrics can be used to save lives! At the Erasmus MC, we apply econometric techniques to improve patient's outcomes and public health, with a particular focus on screening programs. These programs are crucial for the early detection and prevention of diseases such as cancer. As cancer can be treated much better when detected at an early stage, screening can save lives. Optimizing screening programs requires advanced statistical and simulation modeling.

Our workshop is designed to provide participants with insights into how econometrics can be applied in healthcare, specifically in the context of screening. Attendees will get an introduction into how screening programs can be optimized to maximize population life-years, while minimizing costs. Using real-world examples, participants will be introduced to the tools and methods used in our studies, including simulation models and cost-effectiveness analysis. The workshop will be taught by researchers from the Erasmus MC with a background in econometrics themselves.

Join us at the ECD if you want to discover how econometrics can play a vital role in healthcare and how you can make an impact in this dynamic field!

**Meet us at the ECD:**  
**Impact Day Workshop**

- Thursday 13 November
- Afternoon 13:00-15:00

Ever wondered how to turn an idea into the next unicorn AI start-up? In this hands-on workshop, we will guide you through the essential building blocks of creating an AI product, from web design and authentication to working with APIs. Together we will start building a real prototype from scratch so you can experience what it takes to bring an AI tool to life. We will also showcase preppito, our own AI-powered start-up that helps students and starters practice voice-based job interviews. Bring your laptop and get ready to start building your own AI venture!

**Meet us at the ECD:**

**Workshop**

- Wednesday 12 November
- Afternoon 14:00-16:00

The world of tech and computer science may seem challenging at first, but with Turing Students Rotterdam (TSR) you will find the support and resources you need to start your tech journey.

At Turing, we offer a variety of coding courses including Java, R and Machine Learning, as well as beginner and intermediate-level Python courses. These programs are designed to help you build a strong technical foundation, complete with certificates that not only boost your skills but also enhance your CV.

To further support your transition into the tech industry, we also provide an array of career workshops, a datathon, company in-house days, and tech or AI-oriented events at which you can gain inspiration, network, and expand your horizons.

Whether you love programming or simply feel curiosity about the digital world, join us!

Think tech - think Turing!
